

PINCHOT TO SUBMIT COMPROMISE Calls On Operators And Miners Heads To Meet Him at 6

Penna. Governor Will Bring His Intervention to Pre- vent Strike of Anthracite Miners Sept. 1.

(By The Associated Press)
HARRISBURG, Pa., Aug. 29.—Governor Pinchot will bring his intervention to the anthracite situation to a climax tonight. He called on representatives of the mine operators and unions to meet him at 6 p. m. jointly to study a compromise which he has prepared in the endeavor to prevent the suspension of operations September 1.

John L. Lewis, president of the United Mine Workers, arrived here today to lead the miners' union group detained by illness from the first meeting with Governor Pinchot. He sent Philip Murray, vice president, to speak for him. He was expected to give the union's final word on the settlement proposal the governor will have ready tonight.

The terms which some of the governor's advisers said he had in mind included four main points, the first of which would be an agreement by both sides to a 30-day truce and calling off of the suspension order. The operators also would be asked in this version of the matter to abolish all but eight hour day employment and to consent to the installation by the union of its own agents in the company offices on pay day.

Pryor G. Ragland Is Named Delegate To Tax Conference

Pryor G. Ragland, commissioner of the revenue, today received notification from Governor Lee Trinkle that he had been appointed a delegate to represent the commonwealth at the 16th annual conference on taxation, which is to open at White Sulphur Springs, West Virginia, September 24 and which will continue for four days.

Mr. Ragland will receive his commission within the next few days. The governor in his letter of notification, says: "We are all agreed that the fact that one of the biggest problems confronting the world today is this one of taxation. Funds must be had for the carrying on of the various activities of our government and taxes should be equitably distributed so that they are not an undue burden on any one class of people or industry. I am advised that these meetings are always attended by representative business men and economists from all over the United States and Canada and I am sure that if you can attend you will be able to bring back to Virginia something that will be of benefit to us here in the solution of our taxation problem."

Mr. Ragland said this morning that he would try to attend the meeting.

A. Mitchell Palmer To Wed Mrs. Burrall

(By The Associated Press)
STROUBSBURG, Pa., Aug. 29.—A. Mitchell Palmer, attorney-general and alien enemy custody officer in the Wilson administration, and Mrs. Margaret Fallon Burrall, of Waterbury, Conn., are to be married this afternoon at the bride's home at New London, Conn., according to information given out here today by Mr. Palmer's partner. The bride was the widow of J. B. Burrall, a manufacturer, who died at Palm Beach four years ago. Mr. Palmer's wife died two years ago.

\$1,000 FOUND IN A "BOOK"

LONDON, Aug. 29.—The widow of the late bookbinder, who was a partner in a bookbinder's shop, has found a box, containing 200 pounds (\$1,000), was returned to her, that she found it. It appears the "book" was among a number of books which she had sold for three pounds (\$15) thinking they were old medical works of her late husband, and of little value. The bookbinder on examining them discovered one had a lock, and on opening it found a five-pound note and 190 one-pound notes, which he promptly returned to the widow.

CONCEIVES MOVIE PLOTS WORKING IN KITCHEN

WICHITA FALLS, Tex., Aug. 29.—Bus by day—scenario writer at night. That's "Cal" Conant, general factotum in the Y. W. C. A. cafeteria here.

From dishes, pots and pans to intricate movie plots certainly is a far cry, you will admit. But "Cal" happens to be a "struggling author" who's not going to run the risk of starving while he's waiting for the royalties to roll round.

In the restaurant, where he's worked for four years now, ever since he was 16, he has been writing three or four every day. And then he has 10 or 12 a week coming in besides. This time he's along while he's burning the midnight oil over his little pad of yellow paper.

When "Nobody's Money" starring Jack Holt arrived here recently, he was the only one who knew the story of the boy—more a lanky youngster in the gallery and maybe a companion or two—paid any heed to the author's line under the title.

Fact is, none around the cafeteria, except the bookkeeper, remembered having heard "Cal's" full name—Caldie D. Conant.

But down in "Cal's" savings account on the "bus," will find these scenarios. And up in his room was a letter from his agency announcing it had been offered \$1200 for one of his plots, but was holding it for \$1500.

"You say you want my picture?" asked "Cal," as he sat at a load of dishes on the "bus." "Well, will these clothes do?" And "Cal," the scenario writer, posed for the photographer right there in the cafeteria in his bus boy's uniform.

So, if you happen to see the name "Caldie D. Conant" on the screen again, you'll know it's "Cal" of the kitchen brigade.

Warned Minister Of Trouble, Smith States On Stand

Advised Pierce to Stop Criticizing Garretts, Who Were Wrought Up—Attacks on His Testimony Made—Jones First Defense Witness.

(By The Associated Press)
CUMBERLAND COURTHOUSE, OUG 29.—That the witness had warned the Rev. E. S. Pierce that unless he "let up" in his criticisms of the Garretts he would have trouble with them was developed in the cross-examination today of W. M. Smith, a court witness in the trial of R. O. Garrett, charged with shooting the minister to death. Mr. Smith testified that prior to his advice to the minister, R. O. Garrett had asked him what he should do to keep Mr. Pierce from talking about him and worrying him. Mr. Smith who is the Cumberland county commonwealth's attorney and former circuit judge, said he told Garrett to do nothing. R. O. Garrett he said appeared very much wrought up over the matter. Mr. Smith, former state witness was on the stand all of the morning session. He was grilled at length by R. E. Byrd for the state but he stuck to his statement that although the first shots came almost simultaneously he believed the minister fired the first shot. Smith brought on some heated exchanges between counsel for the entire Garrett case. Judge B. D. White, presiding was compelled several times to interpose.

Princess Shorn Of All Riches

NEW YORK, Aug. 29.—The Princess Lavinia, who once moved in splendor and lived in a 15-room suite in the Plaza, lay ill in a darkened room of her home on East Thirty-ninth street today while her physician was downstairs pleading with the Sheriff not to search for her. After Dr. Fiske had made affidavit that the princess was in a critical condition "mentally and physically" and that the service of papers on her would be a shock she might not be able to stand, Deputy Sheriff Joseph A. Langan withdrew, but seized the furnishings of the house and left an assistant on guard downstairs.

The princess is defendant in suits totaling \$213,000. The furnishings seized consist mainly of art objects, antiques, bric-a-brac, paintings of world-famous men by the princess and several reputed old masters.

Capture Three Boats Believed Rum Runners

(By The Associated Press)
SAVANNAH, Aug. 29.—The coast guard cutter "Yamacraw" and the cutter "Tiger" entered port today having captured three boats believed to be liquor runners. The government vessels had been out since yesterday.

Town Topics

The charter revision commission will hold its first meeting on Thursday night at eight o'clock in the city council chamber at which time organization will be perfected and a general subject entered into of the whole subject. W. P. Boardman, chairman, will preside. The secretary of the commission has written to several Virginia cities asking for copies of their charter but he has been successful so far in obtaining only two, those of Norfolk and Lynchburg. Correspondence with the officials of the Virginia cities discloses that a good many municipalities are in much the same position as Danville in having antiquated charters. Some even have no charter at all but operate according to the provision of the state laws.

The council committees will hold their regular monthly meetings towards the latter part of the coming week when reports will be drafted for presentation to the September meeting to be held Monday week. It is expected that the Public Welfare committee meeting will be of considerable importance as the alms-house question is to be brought up as an advisory board to the Public Welfare Committee in working out the plans for the proposed new almshouse.

Not Peaceful Yet In Ireland

(By The Chicago Tribune)
DUBLIN, Aug. 29.—King Rebel- lion is dead—Long live King Trouble! This seems to be the situation in Ireland today.

On the right of the ledger there are some good things:

- 1.—The new state starts out with a credit nation. Ireland exports far more than it imports.
- 2.—The necessity of maintaining 50,000 troops to fight the Valeristas is over; part of the army will be demobilized soon.
- 3.—Case is so far restored that Civic Guards are policing the country. There will be 870 Civic Guard stations in place of 1214 Royal Irish Constabulary barracks.
- 4.—Railroads south and west of Dublin, long subject to sabotage, are operating regularly.
- 5.—Restored transportation has given new economic life to the farm districts.
- 6.—Rebuilding the ruins caused by bomb and arson is progressing.

Now for the ledger's other side:

- 1.—Last figures showed nearly 30,000 unemployed, these figures are apt to be doubled within a few months.
- 2.—The Valeristas have returned, radical as ever, and apt to proclaim himself in favor of a workers' republic.
- 3.—In some districts farm owners are experiencing a workers' strike, which shows a tendency toward arson and sabotage.
- 4.—A section of a new Dalí promises great bitterness. The Free State's very life may be involved. Many Valeristas will run as republicans. Labor will have a long list of candidates, many of the radicals in the Dalí—on one side Free Staters and farmers, safely conservative, on the other side the labor and republican elements.

Last 2 Clues Fail In Lost Baby Hunt

NEW YORK, Aug. 29.—The search for baby Lillian McKenzie apparently reached an impasse yesterday, the ninth day since her supposed abduction from her carriage in front of a store at Sixth avenue and 18th street.

Two leads proved worthless. A woman, took an aunt of Lillian to a baby farm near St. James, L. I. on information that a child resembling Lillian had been seen there. It was not.

Detective Capt. Funston sent men to Brooklyn to another nursery on a similar report. The visit was fruitless.

Hope Abandoned, Vessel Last Seen Battling Typhoon

(By The Associated Press)
CHARLESTON, S. C., Aug. 29.—A long distance telephone message from Mullins today told of the drowning of six people near Conway at 1 a. m. Mr. and Mrs. Sutton Culliver and three children and Mrs. Marvin Connor, all of Conway, losing their lives when their auto plunged through the Wacamac bridge into the river. Marvin Connor escaped drowning. All the bodies have been recovered except that of Mrs. Connor, it is said.

SIX DROWN AS AUTO PLUNGES THRU BRIDGE

(By The Associated Press)
WILMINGTON, N. C., Aug. 29.—Five persons were drowned today when an automobile crashed through an open drawbridge over the Wacamac river near Conway, S. C., according to versions of the accident received here. These victims were the names of the victims as Mr. and Mrs. T. E. Tolliver and their three children. Earl Connor, in whose car the Tolliver family was riding, escaped by leaping, it is said, but no mention was made of Mrs. Connor, who, it is said, was received in Charleston and had been drowned.

Tolliver, according to the long distance telephone operator had been spending the week-end at Myrtle Beach with his family. On the return trip his machine broke down several miles out of Conway and Connor picked them up in his car. When the car approached the drawbridge no lights, it is claimed, indicated the bridge was up and the machine sped through the aperture before it could be stopped. Connor saved himself by jumping from the machine as it started into the open space. Mrs. Tolliver was the eldest daughter of George E. Nichols, S. C. The three children range in age from 5 to 13 years.

Ford's \$4,000,000 Gift Story Denied

DETROIT, Aug. 29.—The story that Henry Ford paid stockholders of the Lincoln Motor Company \$4,000,000, although he was not legally required to do so, which has been used to boom the manufacturer for the President, has been exploded by Edna G. Pipp, a former editor of Ford Magazine, the Dearborn Independent.

Allan L. Benson wrote in the September issue of Hearst's International Magazine that Mr. Ford had done good deeds after he bought the bankrupt concern.

Mr. Pipp challenged this statement and Edsel Ford, the manufacturer's son, admitted to The World correspondent that the stockholders had not been paid. He explained no equitable means of settlement had been found, as the stock has changed hands freely without record.

Bavaria Intends To Separate From Germany Sept. 2

(By Chicago Tribune Service)
PARIS, Aug. 29.—2:40 a. m.—Le Journal this morning announced that Bavaria intends to declare a separation from Germany on September 2, the anniversary of the Battle of Sedan. This information comes from Cretet, a Parisian, who is an important figure in the German movement. He said that demonstrations are scheduled for Nuremberg as well as Munich, on September 2.

Bee Today Makes Its Appearance From New and Complete Printery

The Bee today makes its appearance from the newspaper plant which has been in course of erection for more than a year. The cost of the new plant is estimated at \$100,000. The building as a whole has not been completed owing to many delays in the manufacture of materials used in the construction, these floors devoted to the mechanical processes of newspaper making were finished several days ago and for several days past the gradual transfer of mechanical operations has been going on. Last Sunday saw the transfer from the old building to the new quarters. For a week the task of setting the type has been in progress in the new printery and on Monday the stereotyping was undertaken there, the matrices being cast in the old building and run off on the old press.

Today's Bee is being run on the new four-deck, 32 page Goss rotary press which was installed several weeks ago and which, during the past few days, has been undergoing the trying up process. It is a high speed press and, when the scaffolding now standing on the Union street frontage has been removed, it will be possible for passers by on the street to watch the press in operation.

Several novel features are embraced in the new press. One of these is the Culler-Hamer conveyor system which takes the papers as they are delivered from the press and carries them to an upper floor where the mailing and delivery departments are located. Another feature of the press is the push button system whereby the pressman can control the rapidly rotating disks by the pressure of his finger speeding up the machine or stopping it almost instantly. There are three motors controlling the press, a small one which starts it, a large one which takes over the motive power once it has started and a smaller motor which operates the braking system and which brings the press to a constant stop on the click of a button.

SUNDAY SCHOOL TO HOLD PICNIC IN LYNCHBURG

Tomorrow (Thursday) morning at 8 o'clock the members of Cabell Methodist Sunday School and their friends will leave Danville to spend the day in the Hill City. The headquarters of the picnic party will be at Miller Park in that city. A splendid bathing pool and other attractions insure the youngsters a very delightful day.

To avoid crowding the committee in charge has engaged eleven cars for the accommodations of the members of the school and their friends.

Quite a number of those not members of the school will avail themselves of this opportunity of Sunday a day in Lynchburg, the city for passengers to be at Chatham.

The train will go into Lynchburg at Kemper street station and leave from that point Thursday afternoon at 5 o'clock. Arriving in Danville at 7 o'clock, a great day is expected by those who avail themselves of the delightful outing.

HELEN GOULD IS TO WED BARON

PARIS, Aug. 28.—Princess Viora of Albania arrived in Paris yesterday and confirmed the engagement of her young daughter, Helen Gould, to Baron George Daniel de Montemach, a Swiss nobleman—one of the few in Switzerland.

Frank J. Gould, Helen's father, has been notified, but he will not take part in the ceremony early in October. Neither will the third Mrs. Frank Gould.

Helen has spent her childhood in a convent at Fribourg, Switzerland, where the Montemach family is one of the chief points of local pride. She met Baron George three years ago, when he was an attaché of the Swiss legation in Paris. Baron George is a dashing horseman, popular in Paris and on the Riviera, and a good deal Helen's senior. Princess Viora thinks he is about 35.

Helen is barely 18.

Baron George's title dates from the Holy Roman Empire, when Switzerland belonged to the Hapsburgs.

BANDITS CAPTURE TOWN

SHANGHAI, Aug. 28.—Dispatches from Kailang, Province of Honan, report that bandit hordes attacked and captured the town of Henghsien in the western part of the Province Monday. The invaders, it was stated, looted the shops and wealthy residences and kidnapped approximately 100 persons, including teachers, pupils and a town magistrate.

Corns

Just Say **Blue-jay**

The simplest way to end a corn is Blue-jay. Stops the pain instantly. Then the corn loosens and comes out. Made in clear liquid and in thin plaster. The action is the same.

At your druggist

MAN LOSES HOPE

"For ten years I suffered severely from stomach trouble. The doctors said I had cancer of the stomach and nothing would do but an operation. I took my last round of Mayr's Wonderful Remedy 2 1/2 years ago. Since then I sleep well, eat what I want and feel fine." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. J. C. McFall's Drug Store, and druggists everywhere—adv.

FIFTY THOUSAND WOMEN

would comprise a vast army, yet that is the number who have replied to a questionnaire recently sent out by the Lydia E. Pinkham Medicine Co., of Lynn, Mass. Ninety-eight out of every 100 letters from these women contained positive assurance that they have been benefited or restored to health by taking this old-fashioned root and herb medicine. This is most remarkable evidence of the power over the ills of women. Therefore, with 98 chances out of one hundred that Lydia E. Pinkham's Vegetable Compound will overcome such ailments for you, why should you continue to go through life in pain and suffering—adv.

Baby Food That Cannot Sour

Every mother knows how hard it is to keep baby's food absolutely fresh and sweet in hot weather.

This is a vital matter, for the least bit of sour food may mean a very sick baby.

Mothers who cannot name their babies need not worry about the purity of their baby's food when they use

NESTLÉ'S MILK FOOD

Nestlé's is a complete baby food in powder form. It cannot sour. It is made from the pure milk of healthy cows and condensed so that it will agree with the delicate stomach of a little baby.

Three generations of babies have been kept strong and healthy on Nestlé's Milk Food.

FREE SAMPLE—Write for it now. Give a genuine sample of NESTLÉ'S MILK FOOD, also a letter of praise with your own words to the effect that it is the best baby food you have ever used. If you will, we will send you the sample at once.

KNIGHTS WILL CELEBRATE IN MARTINSVILLE

MARTINSVILLE, Aug. 28.—Labor Day, September 3, will be a red letter day for Martinsville. On this day members of the Knights of the Ku Klux Klan, of the Order of the United Sons of the Grand Dragon, will come to Martinsville to celebrate the centennial of the founding of the Order. The celebration will be held at the Martinsville Hotel.

It is understood that about 75 types from Martinsville, Danville, Stuart, Fidelity, and Roanoke will be conducted across the hot sands in true Arab style.

The special train to bring the Knights from Roanoke will arrive at 10 a.m., September 2, and after the celebration will be conducted to the local D.K.K.s. have arranged an automobile trip to Roundabout Club where a watermelon feast from the club, a parade will be formed at 5 p.m. which will end at the Farmers Co-operative warehouse where the ceremony will be put on.

It is stated by the local D.K.K.s that they expect visitors from Danville, Greensboro, and Winston-Salem. The ceremony is so arranged that the visitors may leave from home by 10:30 p.m.

GRETNNA NEWS NOTES

GRETNNA, Va., Aug. 28.—Among the social events of last night was a miscellaneous shower given for the bride, Mrs. C. M. Ryan at the Pittsford home Thursday p.m. from four to six o'clock by Mesdames E. B. Fitzgerald and O. Ramsey. Many of the brides friends were present and she received a large number of gifts consisting of linen, cut glass, silver, and other useful presents. The bride was already the recipient of many and very handsome bridal presents. Mrs. Ryan, one of Gretnna's popular teachers, will resume her work as teacher in the Gretnna High School on Thursday, September 11.

Four additional rooms of the new building which is being added to the Gretnna high school are almost completed. The concrete walk leading from Henry Street to the school building will be done during the week. Only three changes will be made in the faculty the coming season which consists of fourteen teachers. C. J. Shelton will again be principal.

VA. TO HAVE APPLE EXHIBITS AT FRUIT SHOW

(By The Associated Press)

RALEIGH, N. C., Aug. 28.—Apple growers of Virginia, Maryland and Pennsylvania have already completed plans for exhibiting their products at the National Apple Exposition and Fruit Show in New York City, November 3 to 10 and if financial arrangements can be made, the apple growers of North Carolina also will send exhibit to the exposition. It was announced today by C. D. Matthews, chief of the Division of Horticulture for State College and the Department of Agriculture.

Mr. Matthews said he would endeavor to arrange for fruit growers of the state to supply the exhibits, while members of his organization would bring charge of them at New York. The only thing lacking now to advertise North Carolina's fruit possibilities, he said, is money with which to finance the exhibit.

"The Department," he continued, "is the dramatic feature of an educational movement for the better grading, packing and marketing of fruit exports over all the world. The apple industry of the eastern apple belt, so delicious in flavor, has lagged behind the western apple a long in methods of handling that in most Eastern cities has practically disappeared from the market and is only to be found in the back of the grocery store along with potatoes and turnips. This is an effort to get back on the fruit stand."

"The first floor of the exposition building will be taken up with educational exhibits by states, and commercial exhibits of individuals and co-operative marketing associations showing only such fruits as the growers are prepared to sell in quantity graded and packed exactly as they are selling commercially. Oranges, lemons, apples, pears, and nuts also will be exhibited and sold in commercial pack."

"The second floor of the exposition building will be devoted to the display of the products of the various industries, canned goods, dried fruits, nursery trees, wrappers, labels, containers of wood, glass, tin, and fiber. Most of the space already has been taken up by the display of the products of the various industries."

The Legislature of New York State and some of the New England states made liberal appropriations to assist the growers of their states in the educational program that includes an educational committee in each state and an organized plan to market all fruits as near home as possible to save transportation costs. In Massachusetts where the legislature made no appropriation, the State Horticultural Society with the aid of the manufacturers, business and Chamber of Commerce men raised the money to carry out the plan.

The Exposition movement centers around the Burke County Fair.

AMERICANS IN AIRPLANE CRASH

MAIDSTONE, Aug. 28.—Mr. and Mrs. Douglas Smith of Hartford, Conn., and Albert M. Austin, a New York lawyer, were narrowly escaped death last night when a French airplane in which they were passengers on the trip from France to England, crashed near Maidstone. None of the Americans was seriously injured.

Leslie Gunter, of London, a student at Oxford University was killed. A French passenger and the pilot of the machine escaped unscathed. According to the pilot, the accident was due to the passengers moving too far back in the plane thus upsetting the balance of the machine, which side-slipped and then turned over and plunged over head down and crashed into a group of trees.

Mrs. Smith suffered an injury to her nose, her face was lacerated and her right leg was broken. Both Mr. Smith and Mr. Austin were badly shaken and bruised and also suffered lacerations. The condition of any one of the Americans, however, was serious enough to require the aid of London surgeons who were rushed to Maidstone on receipt of news of the accident.

Miss Beattie Bateman left yesterday for Winston and Charlotte, N. C.

U. S. Bar Association Would Standardize Criminal Code

(Special to The Bee.)

MINNEAPOLIS, Minn., Aug. 28.—The criminal situation in the United States, so far as crime of violence is concerned, is worse than in any other civilized country.

That cold statement comes flatly out of the meeting of the American Bar Association, now in three-day session here.

The apathy and indifference of the American people toward violent crimes must be curbed, it concludes. The report, startling in nature, compares conditions in the United States with those in France and England, and maintains that the only way to bring the people in this way, does it believe constructive action can be obtained.

The report is plain. The system in the United States lacks in the three great essentials for law enforcement; celerity, certainty and finality.

Then the report launches into a comparative mood.

"There were 17 murders in London last year and not one of these crimes was unsolved."

"It is estimated, 7,850 murders were committed in the United States last year. During 1921 there were 260 murders in New York and 137 in Chicago. In the same year, throughout all England and Wales, there were only 17 murders."

"We learned that the prison population in England has been steadily decreasing since 1876, the later period marking about the time when the simplification of the English criminal procedural laws began to be effective."

"One of the striking reasons for this is the fact that it has been made possible for anyone sentenced to a fine to obtain extension of time for its payment by the discretion of the magistrate and a defendant may even pay his fine in installments."

"Briefly, the committee finds that the speedy trials given the criminals is largely responsible for the low crime rate in Great Britain. Blakely said: 'The continual appearance of cases and reversals by the upper courts are practically unknown to English justice.'"

The report shows that in France in 1919, last available figures, there were 588 murders and 121 robberies. This was from a population of 40,000,000.

Contrasting this figure with that in 48 cities of this country, comprising 21,000,000 population—there occurred 1,562 murders, while in New York alone robberies numbered 1,427, Chicago 1,862. Even in Louisville, Ky., with 241 robberies, there were more than in entire France!

"It is not without plain significance that the laws of France—carefully plan and in extreme cases scientifically apply disgrace and exile as a penalty," the report reads. "This recognizes a dominant trait in the French character, his love for his native town and his love for France. Exile is one of the most drastic penalties imposed."

In accounting for the smaller number of crimes in France, too, it must be remembered that 35,000,000 out of the 40,000,000 people live in small villages where their ancestors have lived for generations, and where every act is carefully scrutinized.

The chairman of the committee, Charles S. Whitman, former governor of New York, together with Judge Marcus Kavanaugh of Chicago and Wade H. Ellis of Washington, D. C., were added to the study of the physical application of the criminal laws.

Other members of the committee are: Charles W. Farnham, St. Paul, and Mrs. Annette Abbott Adams of San Francisco.

"Briefly, the committee finds that the speedy trials given the criminals is largely responsible for the low crime rate in Great Britain. Blakely said: 'The continual appearance of cases and reversals by the upper courts are practically unknown to English justice.'"

The report shows that in France in 1919, last available figures, there were 588 murders and 121 robberies. This was from a population of 40,000,000.

Contrasting this figure with that in 48 cities of this country, comprising 21,000,000 population—there occurred 1,562 murders, while in New York alone robberies numbered 1,427, Chicago 1,862. Even in Louisville, Ky., with 241 robberies, there were more than in entire France!

"It is not without plain significance that the laws of France—carefully plan and in extreme cases scientifically apply disgrace and exile as a penalty," the report reads. "This recognizes a dominant trait in the French character, his love for his native town and his love for France. Exile is one of the most drastic penalties imposed."

In accounting for the smaller number of crimes in France, too, it must be remembered that 35,000,000 out of the 40,000,000 people live in small villages where their ancestors have lived for generations, and where every act is carefully scrutinized.

The chairman of the committee, Charles S. Whitman, former governor of New York, together with Judge Marcus Kavanaugh of Chicago and Wade H. Ellis of Washington, D. C., were added to the study of the physical application of the criminal laws.

Other members of the committee are: Charles W. Farnham, St. Paul, and Mrs. Annette Abbott Adams of San Francisco.

MISSION SCHOOL A CITY WHICH SUPPORTS ITSELF

CHICAGO, Aug. 28.—A community self-sustaining, operated upon systematic business methods which include all the latest labor-saving devices, but where no one receives any pay—that is the institution of St. Mary's Mission House at Techny, Illinois, 20 miles northwest of Chicago, where Catholic foreign missionaries are located.

Its parks, farms and industrial plants occupy more than 800 acres, managed by the priests and brothers, who work for nothing. The 119 brothers, to the manual work. The arising hour is 4:30 a. m. and all must have retired at 9:30 p. m. Each of the 32 priests is a business man, as well as an educator of immigrants.

The residents make their own ice, grind the grain which is raised on the farms, generate their own electricity, do their own butchering, have their own dairy farm live-stock, chicken, vegetable and fruit farms and carpenter, painter, plumber, blacksmith, shoe and soft drink shops. Tombstones for their use are carved at home.

The flour mill turns out 20 barrels of flour a day. There are constantly on hand in the granary 10,000 bushels of oats, 5,000 bushels of wheat and 1,000 bushels of rye. The bee hives produce 6,000 pounds of honey in a season. The dairy produces 175 gallons of milk a day and 300 pounds of butter a week.

The printing plant is equipped with the most modern appliances. The four monthlies issued by the institution have a combined circulation of 175,000 and the three annuals, 150,000. More than a million pamphlets are printed during the year. The book bindery does all the binding of the library books.

Automatic milkers are used to milk the cows, whose food is brought to them on electric trolleys. Automatic stokers are used in the boiler rooms and the food for the meals of the priests, brothers and students is carried to the dining room doors in electric heated oven cars. Tractors and other modern farm equipment are utilized.

The chairman of the committee, Charles S. Whitman, former governor of New York, together with Judge Marcus Kavanaugh of Chicago and Wade H. Ellis of Washington, D. C., were added to the study of the physical application of the criminal laws.

Other members of the committee are: Charles W. Farnham, St. Paul, and Mrs. Annette Abbott Adams of San Francisco.

A THOUGHT

It is naught, it is naught, saith the buyer; but when he is gone his way, he boasteth.—Prov. 20:14.

I WILL give thrice . . . to any well-deserving friend; but in the way of a bargain, mark me, I will cavil on the ninth part of a hair.—Shakespeare.

WEDNESDAY, AUGUST 29, 1923.

THE LURE OF THE MOTOR PEGASUS.

The large number of automobile thefts which are occurring in this city with extraordinary regularity means one of two things that the local police officers are more astute than those in other cities in detecting this growing offense, or that the car thieves are more numerous in Danville than in other parts. Not a week passes without its usual quota of identifications of stolen property, usually from North Carolina and, nearly always with arrests made. The exposure made here more than a year ago which resulted in the baring of the activities of an organization which specialized in stealing cars, resulted in a quiescent period following the conviction of the guilty men. More recently there has been a revival in this nefarious art of stealing automobiles and it has been noted that many of the offenders are youthful, frequently below their majority. The most plausible explanation of this apparent concentration on Danville for misdoing is the same which can be offered for the large number of fugitives from justice who continue to be caught here. It is the fact of a borderland community. Offenders coming up from the adjoining State are attracted to Danville because it is the first city of size they encounter on the northward trek and the lawbreaker invariably heads to the larger centers of population where his identity is more likely to remain to be cloaked than it would be in some smaller town. There is also the brighter prospect for the disposition of stolen cars here though recent experiences have made both dealers and individuals wary in trading for machines. The most effective to combat car stealing is to make a sharp example of those against whom the evidence of theft is patent. Swift justice is always effective and a few exemplary cases will deter car robbers from engaging in what is little more than modernized horse-stealing. It would go a long way towards impressing on their minds the undesirability of trafficking in stolen property here and the wisdom of giving Danville a wide berth. From what we have been able to see the local police force is doing all that might be expected of it and is dealing successfully with a large number of cases. What is needed is swifter punishment to fit the crime.

BELOW EQUATOR.

It is common for a wealthy Latin American to purchase five or six autos at a time, great ropes of pearls, diamonds, sapphires and rubies. This is the most interesting fact brought home by E. M. Newman, travelogue lecturer. Newman is enthusiastic, and with good reason, about the possibilities of trade between United States and Latin America—particularly Argentina. He figures that South America has a purchasing power three times as big as France and 10 times as big as Japan. There is a market north going after.

Ten years ago, when Newman visited South America, he noticed very few American autos. On his recent trip he found American cars by the thousands. Our autos are so popular south of the equator that they have practically driven the cars of all other nations off the market. Newman says: "Contrary to the popular impression, South Americans have great pride in their personal appearance. American collars, shirts, sweaters, hosiery, shoes and hats

find great favor. American moving pictures are the only ones shown. Mary Pickford, Douglas Fairbanks, Charlie Chaplin and Jackie Coogan are as well known in South American cities as they are in our own."

Good news, that we are finding such favor with our neighbors to the far south. Argentina is an especially logical market for the American manufacturer. Lecturer Newman believes, because: "The people of Argentina are the most extravagant race in the world today. Their extravagance exceeds even that of the Russian nobility during the czar's regime." Newman says that Argentine women, when they appear in public places of recreation, are so dazingly appareled and bejeweled that they eclipse in splendor even American women.

All of which are surface indications of enormous natural resources and national economic productivity that will place Argentina—(Brazil also)—in the top rungs of world powers. Many of us are so hypnotized watching the decay of the old civilization in Europe, that we forget that there's a mighty new civilization rising on the South American continent. Argentina, in some ways, is the key nation of the world. Psychologists know that the epidemic of world restlessness that culminated in the World War cropped out first in Argentina in the form of the tango, mother of jazz life.

GETTING STUNG

(Durham Herald.) Newspapers which are constantly on guard against being worked for free publicity, and some times turn a deaf ear to worthy causes, are being victimized beautifully by Jack Dempsey, Luis Firpo, Tex Rickard and others interested in the financial success of the heavyweight battle scheduled for next month. We can't point our finger at some other newspaper about it, for we are being ridden for all we are worth just as the others are.

But, it all comes under the head of news, they say, and if we didn't carry the rot about the coming fight, the fans would rise up in their might and call us everything else but blessed. It is a case where the advertising has so wrapped itself in cloths labeled "news" that small chance of lodging it.

That fight is purely a commercial venture, and the stuff that is being said in advance about it is nothing more than advertising. Yet, the promoters are getting the most kind of advertising—advertising that reputable manufacturers and others engaged in constructive work would be willing to pay thousands of dollars to get, and can't get. But the fight promoters are getting it for nothing. Were it not for the publicity that the newspapers will give the fight, the attendance would not be enough to pay the expenses. But the newspapers are being worked sufficiently to ensure the financial success of the venture. Not only are newspapers carrying the stuff free of charge, but are paying out good money for it. Well, such is life. You dodge one thing only to run smack into something else just as bad and have to take it.

MOORS

Thin landlord of a scattering estate. The sea's sol is the one I understand. There is in me no steamy loam of Compacted for one purpose, love or hate. But particles that will not integrate. That ship, minute Saharas, from the hand. Grained to disperse—in such uneasy sand. My mind confronts its own most colorful trait. Few are the vagabonds whose gray thing only to run smack into something else just as bad and have to take it.

VIRGINIA FRUIT WILL BE SENT TO ROYAL SHOW

WINCHESTER, Va., Aug. 25.—Several carloads of apples, gathered from the commercial orchards in various sections of the state, will be sent to the Royal Fruit Show in England in November by the Virginia Horticultural Society. William P. Massey, secretary of the society announced today.

It is planned to have the growers select fruit famed for its flavor and general quality. The name of the growers will be stamped on each barrel. Massey pointed out that Virginia is the first state in the eastern belt to undertake the exhibition of its fruit in England. Heretofore, he said, no eastern or middle western apple growers state has undertaken the task, although several of the far western states have had similar exhibitions for some time. The idea of the society in sending the exhibit to England this year, Mr. Massey said, was to compress the English trade generally with the fine quality and flavor of the Virginia fruit.

The plan outlined by Mr. Massey has received the sanction of the society and the board of directors has appropriated a sum to defray the expenses incidental to the exhibit. The next annual meeting of the directors will be held in Roanoke next January 15.

BOBBED HAIR TO GO: EARS INTO VIEW

NEW YORK, Aug. 28.—Bobbed hair must go. The National Hairdressers' Association, Inc., announced it is planning its third annual convention at the Hotel Pennsylvania, the week of September 19 with three purposes in view. Bobbed hair must go to the committee says, because its effect was ruined when the hair was adopted by women of thirty or older. Flappers with bobbed hair are all right, say the hairdressers, but with the older generations taking to it as they have, the hairdressers are moved to rush forward with curls, switches and transformations. Besides, long waves are the present styles need long locks for harmony.

Scoop's Colyum

DRAKES BRANCH, August 29.—(Greenville Wireless.) The mighty dollar has very human qualities. For instance, it is said that money talks; but that isn't its only human quality. Money, in fact, is inclined to follow the band wagon; to be attracted by the noise and bustle of ACTION. The breezy atmosphere of success draws it like a magnet, not even men will invariably trail the path that leads to victory in the struggle won by others.

Money locked in a safe or hidden away makes no profit for its owner. It works only for the man who gives it a chance to do something. Just as the man who isolates himself and narrows his field of action loses the incentive to work or produce, he lacks the spirit of the fight when there is no fight to spur him on; he just settles down as a cracker-box warmer and gets in other peoples' way.

That is why advertising has come to be the guiding spirit of the Dollar Brigade. Advertising brings action. It gives money a chance to exercise itself and expand its muscles. In business, dollars flock to the advertising standard. They can be won, slowly and awkwardly, in other ways, but advertising is the one sure way to line them up quickly in marching order. Advertising provides an incentive that stirs the ambitious dollar to its best. Money, like humans, needs a stimulus.

People buy what they want; make 'em want what you have to sell.

Micco: The Esquimo girl sleeps in her white bear skin and is very healthy. Aunt Maria: Well, I hope you are not contemplating any such indecency! When will these fads cease?

Last night I held a little hand, So dainty and so neat, I thought my heart would surely burst, So wildly did it beat; No other hand into my heart Could greater gladness bring. Than that I held last night which was FOUR ACES AND A KING!

So Simple! How dear to our heart is the old silver dollar, when some kind member presents it to view, the Liberty bell, without a word or collar, and all the strange things which to us seem so new. The wide-spreading eagle, the arrow below it, the stars and the words with the strange things they tell; the coin of our fathers, we are glad to see it, for some time or other 'twill come in right well; the spread eagle dollar, the star spangled dollar; the old silver dollar we all love so well.

Latin Verse. "Nigritus dardabus, No starorum, Fencibus climbabus, Pantibus torum." (Gezabus hootchabus, Eyes aglourous, Drinkabus hootchabus, Heavenward saurum!)

Ask Dad! A school teacher was annoyed by the continued misbehavior of one of her boys. At last she exclaimed, in exasperation, "I wish I could be your mother for one week!" "All right, I'll speak to Pop about it," replied the youngster, coolly.

An Oregon girl chewed forty-four sticks of gum at one time, and all our local Holsteins are envious of this wonderful record.

When in Rome do as the Romans do; when in Hindustan do as the Hindoos.

A missionary writing after two years in darkest Africa says: "The members of my congregation refuse to give up the practice of cannibalism, but I am happy to say they have learned to eat with a knife and fork."

Amos Tash says: "You never realize how many parts an automobile has till you hit a telegraph pole."

Unless you happen to be Oppenheimer yourself, says Dave Penn, don't knock.

The average woman can't see any use of suffering if you have to suffer in silence.

Notwithstanding the great number of them being shot, statistics show

The REFEREE

By ALBERT APPLE.

MOTHER

Convicted of beating his aged mother and throwing her out into the street, a young man in Sault Ste. Marie, Mich., is sentenced by the judge never to see her again.

His mother, of course, will soon forgive him—probably has already.

Mother love is more than an emotion. It is a definite force, like gravity or magnetism. A great many of the things we call emotions are natural forces too powerful to be controlled by the individual. In their clutches, we get our great inspirations or make our big blunders. Map is a violin played by the bog nature, producer of more discord than harmony.

CHANCE

Scientific magazine tell how J. D. Thompson invented the pneumatic rubber tire. His little child, riding in a baby carriage, objected to the bumping of wheels. So he took rubber tubes, filled them with water and secured them to the wheels. Later he got the idea of filling the tubes with air instead of water.

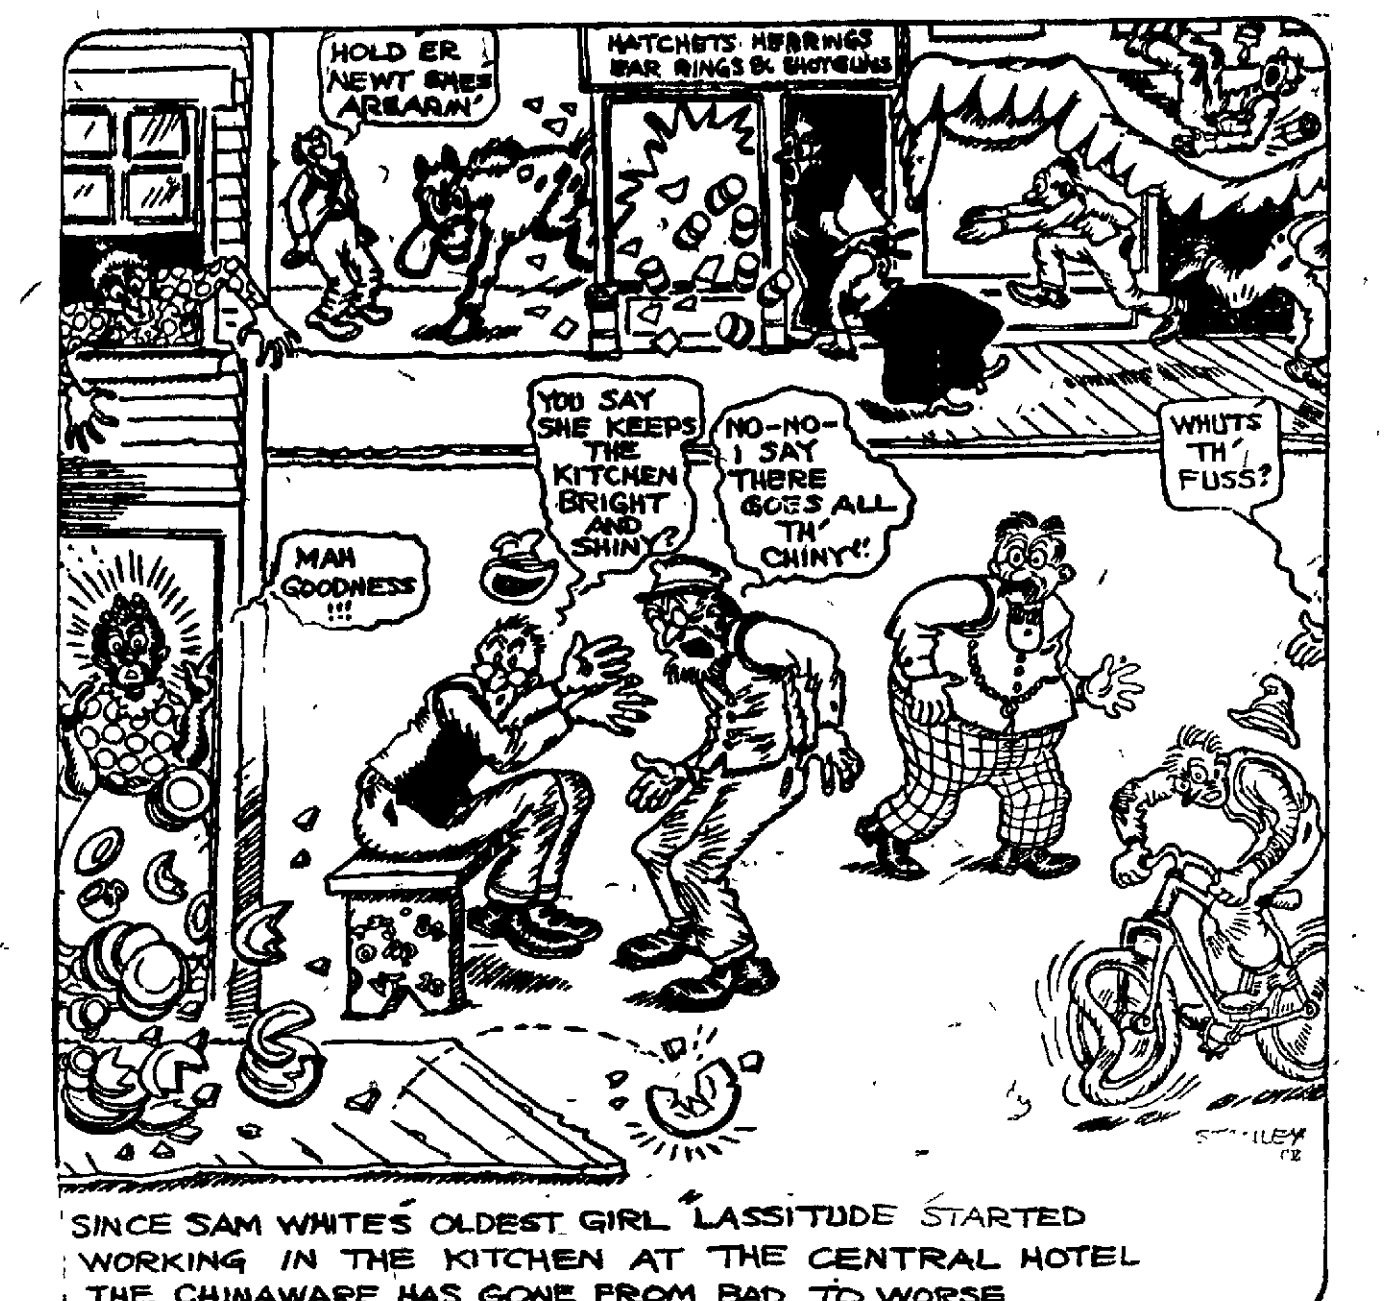

From this came the pneumatic tire used in autos and berrles. It is a service to humanity usually given in attempts to make life happier for a near relative or friend of the inventor. Let us hope the mother of more inventions than necessity or laziness.

DIVOUT

Do you attend church? Sixty million people out of six hundred million are not church-goers, according to statistics by a New York clergyman.

THE OLD HOME TOWN

By Stanley

married men live longer—or it seems longer. An old bird cage placed over an electric light protects it, during a stormy night. Moths may be kept out of blankets. That's the trouble. They may be, or may not.

THE YELLOW SEVEN

BY EDMUND SNELL

ILLUSTRATED BY CLAYTON FIELD

ONE SERVICE REQUIRED

BEGIN HERE TODAY

Chai-Hung is leader of the Yellow Seven, a group of Chinese bandits. Peter Pennington, who is detailed by the government to apprehend his chief-of-staff, Rabat-Pinat, British North Borneo. Pennington leads an expedition to capture the bandit leader. Peter is assisted by his chief-of-staff, Rabat-Pinat, who, because of a personal grievance, hates Chai-Hung bitterly.

NOW GO ON WITH THE STORY

A bullet drilled a hole in his temple and Dawson laughed aloud. A knot of fanaticism—running short of ammunition—balled their approach with a shower of rocks. Dawson dispatched the first man with his pistol and the remaining took to their heels to fall upon the bayonets of the last of Clay's party. There followed a period of breathless, hand-to-hand fighting and presently he woke to the sudden realization that they were on level ground, in fierce pursuit of the last defenders of gradient.

Clay's voice bellowed after him. "Dawson! Dawson, come back here! We've gained our objective and it won't pay us to go farther."

The D. O. retired with evident reluctance.

He found Clay with his back against a rock, blinding up his hand with strips from his handkerchief.

"Halt!"

"Nothing to speak of. You are all right?"

Dawson felt himself all over.

"Not even a blighty! It's very disappointing. When I get back to my little log-but in the trees, nobody'll believe I took part in the scrap at all."

Clay was sucking at the stem of an empty briar.

"I'll give you a certificate to that effect! I think we've every reason to put ourselves on the back. We're in occupation of the entire ridge, plenty of cover and a clear view of Chai-Hung's headquarters."

He knotted the improvised bandage and drew it taut with his teeth. "The Yellow Seven are hemmed in on the plateau. Pennington is advancing on our extreme right. Rabat-Pinat is in charge of the left flank. Behind the earthworks they've chucked up there's a sheer drop of eight hundred feet."

Dawson bowed Clay's bloodcurdling and in the first gray light of approaching dawn, focused them on a broad, squat pile of rockwork barely a quarter of a mile ahead. A pole jutted from the center of this mass and from it swung a yellow flag.

"Better get a stretcher-party to work," he remembered suddenly.

"I've told my sergeant already."

He glanced back and saw Pennington coming up the slope. He left a man in a sling and there was a broad strip of plaster across one cheek.

Pennington dropped to the earth and lay on his stomach, his chin propped on his hands. Dawson, I want you to take over my section. I'm going to grab six everybody. The scout to up a few extra men, there's to be a quick breakfast after which we can get on the second part of our program. Clay, your party—together with a further platoon. He snatched

A doctor in Texas, Texas, is buried in his \$35,000 coat of Russian sable fur. Such was his last request. It's an exception to the rule that we can't take our wealth to the grave with us.

The good doctor apparently expected cold weather on the other side of the River Styx.

CHANGE

The cable now cannot successfully compete with radio, due to the great advantage of speed on the part of radio and ease to direct communication.

This is said by Owen D. Young, chairman of General Electric Co. and Radio Corporation of America.

It's his natural viewpoint, considering his business connections, but it's logically true.

Later it will be discovered that the steam railroad, running on steel tracks, cannot compete with the airplane.

"Not even a blighty! It's very disappointing. When I get back to my little log-but in the trees, nobody'll believe I took part in the scrap at all."

Clay was sucking at the stem of an empty briar.

"I'll give you a certificate to that effect! I think we've every reason to put ourselves on the back. We're in occupation of the entire ridge, plenty of cover and a clear view of Chai-Hung's headquarters."

He knotted the improvised bandage and drew it taut with his teeth. "The Yellow Seven are hemmed in on the plateau. Pennington is advancing on our extreme right. Rabat-Pinat is in charge of the left flank. Behind the earthworks they've chucked up there's a sheer drop of eight hundred feet."

Dawson bowed Clay's bloodcurdling and in the first gray light of approaching dawn, focused them on a broad, squat pile of rockwork barely a quarter of a mile ahead. A pole jutted from the center of this mass and from it swung a yellow flag.

"Better get a stretcher-party to work," he remembered suddenly.

"I've told my sergeant already."

He glanced back and saw Pennington coming up the slope. He left a man in a sling and there was a broad strip of plaster across one cheek.

Pennington dropped to the earth and lay on his stomach, his chin propped on his hands. Dawson, I want you to take over my section. I'm going to grab six everybody. The scout to up a few extra men, there's to be a quick breakfast after which we can get on the second part of our program. Clay, your party—together with a further platoon. He snatched

A doctor in Texas, Texas, is buried in his \$35,000 coat of Russian sable fur. Such was his last request. It's an exception to the rule that we can't take our wealth to the grave with us.

The good doctor apparently expected cold weather on the other side of the River Styx.

CHANGE

The cable now cannot successfully compete with radio, due to the great advantage of speed on the part of radio and ease to direct communication.

This is said by Owen D. Young, chairman of General Electric Co. and Radio Corporation of America.

It's his natural viewpoint, considering his business connections, but it's logically true.

Later it will be discovered that the steam railroad, running on steel tracks, cannot compete with the airplane.

Anvil Sparks

Just a short time until boys and flies quit getting shoeless.

Our guess is nine million acres of skin has been scratched by vacationists this summer.

Just wait until frost. Then go out in the garden and laugh your head off at the weeds.

Fall fashions say germs must jump higher than ever to grab the hem of a skirt.

Soon to be time to take down the screens and let the flies out of the house for winter.

Many of the light summer suits have shrunk until they are almost a vest and knee trousers.

Wear your best shirts now. Why save them until you have to start keeping your coat on?

Better start carrying last winter's ashes out.

When school starts, ten million necks get washed.

The too smallest shoe on earth is any shoe on a foot that has been shoeless all summer.

Won't it be fine when get the screens down so we can throw things out the window?

Boy's school trousers should have a hip pocket big enough to hold a geography or cushion.

Thoughtful mothers pad the seats of school pants.

Grown sister's bathing suit will make a fine basketball outfit for little Henry this fall.

Trim the fringe off father's trousers and use them for making Johnny a cowboy suit.

Run your old straw hat through the electric light. Makes as good a breakfast food as any.

Bedbugs may be killed by inviting in relatives so skinny they starve the bugs to death.

FIFTEEN-YEAR-OLD GIRL IS FARMING CHAMPION

PEGGY KEITH ON THE FARM

WASHINGTON, Aug. 29.—Uncle Sam's prize farm girl is Peggy Keith, aged 15, of Fauquier county, Virginia.

So well does Uncle Sam think of Peggy and her accomplishments that he is taking her and some samples of her farm products all the way to Springfield, Mass., where they will be shown at the Eastern States Exposition of boys and girls club work at Camp Vail, Sept. 18-23.

What Peggy has accomplished will be held up as an example of what ambitious girls and boys can do when the mix brains with energy and enthusiasm and as a lesson to older folks on the advantages of adopting modern practices in agriculture and home economics.

Starting as a member in girls club work in 1916, at the age of 8, Peggy has climbed to the top in seven years. And as a visible product of her efforts can show a herd of 90 fine Shetland ponies, blooded Guernsey cows and bulls, prize-winning chickens, blue-ribbon colts and a stock of health and enthusiasm that would be worth millions in Wall Street.

Peggy's first venture in agriculture was made as a member of the county potato club in 1918. She planted a small patch and worked it herself, with fair results. The biggest gain was in deeply rooting her enthusiasm for club work.

The next year she joined a corn club and put in a whole acre of corn. Things were coming fine. She had plowed and worked the land herself, and the hardest of the cultivation was past when cattle broke into the field and played havoc with the prospects. Next year, however, she had better luck and harvested 75 bushels of corn from her acre.

In 1919, at the age of 11, Peggy signed up with a canning club. She grew a tenth of an acre of tomatoes and canned and pickled enough of the product to feed the family over the winter.

So successful was she in her canning operations that her fruit and vegetables for two successive years pulled down the prizes in the open classes for canned goods at the Fauquier county fair.

It was the outdoors, however, that appealed most to Peggy. She looked for a year-round agricultural interest and found it in livestock.

From one setting of eggs she has developed a flock of 100 standard-bred Langshans and Rhode Island Red chickens.

She reared the baby beef club and in 1919 grew to fine Shorthorn heaves, which she tended and fed according to methods advocated by the Department of Agriculture. In 1920, with a stock, she made a profitable business out of baby beef. In 1921 her Hereford beef calf won first prize at the Richmond State Fair, gaining 400 pounds in a short feeding period.

Peggy now plunged into the study of livestock in earnest. She took a course in livestock judging at the Virginia Agricultural College and soon could tell the good points of her animals as well as much more experienced judges. In a competition among club members, she was selected as Virginia's representative in an international livestock judging contest.

Peggy proves that bobbed hair and knickers do not necessarily denote the flapper, for certainly no one would accuse her of flapperism. But for the active, outdoor life she leads she finds the bifurcated gird and short hair both more practicable and pleasant than plaited braids and swishing skirts.

PREMIER OF JAPAN
TOKIO, Aug. 28.—Count Gombel Yamamoto has been appointed premier of Japan to succeed the late Baron Kato, who died last week. The appointment followed a summons to court by Prince Regent Hirohito who acted upon the advice of the Genro, or elder statesmen. The new premier is proceeding toward the formation of a cabinet, which is expected to be completed soon.

SOCIAL ACTIVITIES

Guests Leaving Berry Hill.

The party of young Danville people who have been among the members of a delightful house party given by Miss Varilla Sims at her country home, Berry Hill, in honor of her husband, Miss Imogene Lamberton, have returned to the city.

Stuart Wheatley and his guest, Dick Edmunds, left Monday. Chilton and Richard Day, Joe White Trundle, Tredway Gravelly, Misses Annie James, Betsy James, and Ann Withers returned home yesterday.

Miss Imogene Lamberton will remain with Miss Sims for several weeks.

Trip to Western N. C.

Mrs. J. J. Hickey, of Richmond, and Mrs. C. C. Dula left today for an auto trip through several interesting points in Western North Carolina.

Anderson Apartments.

Mrs. Otis Dodge and son have returned from Mobile, Ala., where they have been visiting Mrs. Dodge's parents for several weeks. Mr. and Mrs. Dodge have moved into one of the Anderson apartments on Virginia avenue.

Miss Brown Entertains Visitors.

Monday evening, from 7:30 to 10:30 o'clock, the home of Miss Parrish Brown, of Witt, Va., was the scene of a gathering of happy young people who were entertained by a number of her friends in honor of her house guests, Misses Mabel and Beckie Norton, of Prince Edward county. After playing games, the guests were served delicious cream and cake.

Mrs. J. J. Hickey, of Richmond, and Mrs. C. C. Dula left today for an auto trip through several interesting points in Western North Carolina.

Family Reunion At Whitcomb.

The home of Mr. and Mrs. M. A. Thornton of Whitcomb was last Sunday the scene of a happy event, a family reunion. Mr. and Mrs. Thornton and thirteen of their fifteen children were present. At 11:30 a.m. all gathered around a beautifully decorated table in the dining room and were served to many good things such as are common to the season, ice cream and cake and delicious watermelon and many other good things.

Persons.

Mrs. J. A. Vance, of Winston-Salem, N. C., is visiting her sisters, Mrs. S. J. Anderson and Mrs. Nathan Fitzgerald, Jefferson street.

Persons.

Mrs. Howard Guerrant has returned home from a visit to friends at Mr. and Mrs. J. M. Barker, at Axton, Va.

Persons.

Dr. E. Howe Miller left last night

How to Keep the Baby Well

DEFICIENCY DISEASES

We have seen that the well being of the child centers about its nutrition. Proper diet is the key stone in the arch of the baby's health. Pediatricians (baby specialists) have long known this, but this great fundamental truth is now also permeating the minds of the lay people. Medicines may occasionally have their uses in certain conditions during infancy to meet special indications, but the all controlling and deciding factor will be the diet, in simple words—the baby's food.

We are now living in an age which is witnessing a great movement to reduce infant mortality and to create the best possible living conditions for our youngsters. The essence of this movement is really the effort to bring home to the mother the importance of the newer knowledge of nutrition and the plain facts of child hygiene. It is not the aim of this movement to make nutrition experts of every mother, what it is intended is to arouse an interest in problems of nutrition and child hygiene and to obtain the sympathetic cooperation with those who made child welfare their profession and life work.

That education concerning the dominant role that nutrition plays in the life of the infant is very necessary may best be judged from a daily experience. We have in mind a little infant of five months in a condition of infantile atrophy or anorexia. This is a condition which results from improper nutrition and infants suffering with it are unable to assimilate food. The mortality among such infants is naturally very high.

The most expert pediatrician must tax his ability and ingenuity to the limit in order to devise a food formula which the infant can assimilate. Now in caring for such an infant the attending pediatrician found it very difficult to turn the attention of the mother to the importance of the baby's food instead of the medicine. It took a great deal of persuasion to convince her that in such a condition the only thing that would enable the child to live would be food digestion and assimilation, and that medicine in this condition would surely upset the infant's digestion.

The importance of proper diet during infancy (truly, there is no period in human life when proper diet is not important) may be further realized when we consider the following fact. In comparison with other animals the human organism has a very feeble capacity for growth. The rat, for instance, is able to multiply his weight in a period of 250 days fifty times. The new born pig weighs two pounds and, if properly fed, weighs at the end of 250 days, 300 pounds. The human infant, on the other hand, with a birth weight of seven pounds, will, if properly fed, weigh only 21 pounds; that is it will be able to multiply its body weight only three times. We therefore see that the infant has a feeble capacity for growth even under the best of circumstances and every possible thing must be done to give it an opportunity for normal development. Any handicap during the period of infancy will have a most telling effect for the future normal development of the individual in a great many respects—size, muscular efficiency, resistance to infection and mental vigor.

In the Children's Clinic of the University of Vienna the conception was evolved that during the last two years of the infant's life it must undergo a certain school of training with regard to nutrition. The first two years of the baby's life we shall therefore call the School of Nutrition, and we shall consider what are the things the baby must learn during these two years in order to successfully graduate into the struggling world with no nutritional handicap.

for Rochester, Minn., to attend the Mayo Surgical Clinic.

Mrs. J. B. Crews and son, Brooks, have returned from Henderson, N. C., where they have been spending the summer.

D. S. McGraw is stopping a few days with Mr. and Mrs. C. C. Crews. Mr. McGraw has been ending some time at Patrick Springs and will return to his home in Richmond in a few days.

Mr. Nicholas Ruffin, Jr., has returned home from a pleasant visit to his parents, Mr. and Mrs. Woods, Purley, N. C.

Miss Ethel Woods has returned from a pleasant vacation and is stopping with her sister, Mrs. W. N. Ruffin, Jr.

Miss Irma Patterson who has been visiting friends in Gretna, Va., has returned home.

Miss Annie Ramsey has returned to Danville after a very delightful visit to friends in Gretna, Va.

Mrs. Nell Coleman and daughters, Misses Lila and Martha, have returned from a delightful visit to friends and relatives in Richmond.

Miss Oliver Perkins has gone to Richmond to visit her aunt, Mrs. L. C. Clark.

Mrs. R. L. Burch has returned to her home on East Lee street after a very pleasant visit in Greensboro.

Mrs. Dupert Boyles of Greensboro, is visiting Mrs. R. L. Burch on Lee street.

Miss Helen Osborne and James Osborne have returned to their home in Charlotte after a visit to Mr. and Mrs. F. Broome.

Miss Juliette Mandie, who is an operative patient at the General Hospital is reported as improving.

Dillon Barnett, Memphis, Tennessee arrived this afternoon and will make his home at 204 Jefferson avenue.

N. Newman, of the Hub clothing company, is among the Danville merchants now in the northern markets.

Mrs. John D. Davis, who has been visiting her parents, Mr. and Mrs. Harry W. Thomas at the Stone-wall apartments, returned yesterday afternoon to her home at Lynchburg.

Mrs. F. W. Townes and Mrs. Harry Lea and children spent yesterday in Greensboro.

Home Town Guests To Visit White House

NORTHAMPTON, Mass., Aug. 28.—Judge Richard W. Irwin of the Superior Court bench of this State announced today that he and Mrs. Irwin had been invited by President and Mrs. Coolidge to spend a few days at the White House. They will leave this city tomorrow. They are the first friends of Mr. Coolidge from his home town to be invited to Washington as White House guests.

Fashion

LESSON XXIII

Daily Sewing Hints from VOGUE

FITTING

We have now covered the whole field of sewing except fitting. At all paper patterns are cut according to standard sizes. It is frequently necessary to make slight adjustments to suit individual figures. Careful basing on the indicated seam lines and a knowledge of fit are requisite for successful results.

No alterations should be made until the entire garment is adjusted, carefully pinned, and subjected to a close scrutiny. Shoulder and armholes are attacked first of all as it is on the right location and size of these important features that the well-fitting bodice depends. The normal shoulder seam is a straight line from the neck to the armhole in an inconspicuous place just back of the highest part of the shoulder. Square shoulders may require the letting out of the shoulder seam, and sloping shoulders the taking in of a deeper seam to remove wrinkles at the front and back of the shoulder.

Radical changes at the shoulder usually necessitate clipping the waist slightly under the arm, and marking carefully with pins the exact line on which the sleeve is to be sewed. The accepted armhole line defines the exact width of the back and chest and calls for a fairly short shoulder. Any increase or decrease in the width of the sleeve is made by the seam of the sleeve, and the latter so adjusted in the armhole that the straight threads of the cloth hang straight down the arm from the shoulder to the elbow, the fullness being eased to fit the top of the arm, giving the appearance of no gathers.

Desired changes in the line at the neck for greater becomingness should be made with pins placed close together.

If you desire further information regarding any question of dress-making, write "The Vogue Editor" care of The Bee. Your letter will receive prompt and careful attention.

The Tangle

LETTER FROM LESLIE PRESCOTT TO THE GAY LITTLE MARQUISE

I didn't expect to write you so soon again, but there is something that is worrying me, little Marquise. Not a great big worry but a kind of restlessness feeling like the dull pain of some forgotten and supposedly healed scar.

Ruth seemed so queer when she saw the baby. She picked him up and looked at him until he grew restless and began to cry and as he did that one of his eyebrows raised itself in the middle just as Jack does, and Ruth exclaimed, "Why, Leslie, if Jack was his father this baby could not look more like him."

"I am so glad," I answered. "You know I have a theory, Ruth, that people grow not only to be alike in manner and disposition if they are long together, but they grow more or less to look alike. I expect this baby, by the time he grows into a boy big enough to go to school, to look like both Jack and me. It won't be so hard for him to look more and more like Jack if he already has a few little mannerisms. Besides, you know, Ruth dear, that Jack is a very handsome chap."

When my husband came home, I told him what Ruth had said and he seemed quite annoyed. "I never did like Ruth Ellington very well. Her greatest fault is curiosity. It has gotten her into a lot of trouble, not only with her friends, but with her husband. I have always believed that she would have avoided much of that talk which has surged about her in connection with Walter Burke if she hadn't been so curious to know just how far Walter would go with a little encouragement. I never did care for these curious women, Leslie."

"But I don't think," I answered Jack, "that it was wholly curiosity which made Ruth encourage Mr. Burke. You must know, dear, that Harry is always deep in an affair with some other woman. A neglected wife has some excuse if she knows that her husband is untrue to her."

"Nevertheless, my dear," said Jack, "I believe it is Ruth's curiosity more than anything else that has always gotten her into trouble. Curiosity is the greatest temptation in the world, you know, and Ruth never has seemed to understand what happened to Bluebeard's wives."

"But I can't understand, Jack," I interrupted, "why she should be so curious about the baby. As far as I am concerned, I don't care if he were like Topsy and just grew." The next time she speaks to me about it, I'm going to tell her so.

"That's right, Leslie, but it is probable that she will never speak about it again. By the next time she comes here her curiosity will have gone off on another tack."

"Nevertheless, dear little Marquise, it gives me a kind of uncomfortable feeling to think that every time I go out with my baby some one is going to make some curious remark about it."

That is what I wanted to tell you in the first place and I told you all the rest leading up to it.

TOMORROW: Leslie writes to her sister, Alice—The happiness of "natural love."

BY DR. CLIFFORD C. ROBINSON

LIFE EXTENSION
Today the healthy man at 40 has the average chance of attaining 65 or 66, before he shuffles off. The woman of the same age is granted about two years longer.

Science is gradually conquering disease. With preventive medicine developed to its maximum within the coming decade, centenarians may become numerous as bootleggers under prohibition's protection.

Current newspapers and medical journals have astonished the world in the past few months by their announcements of medical skill victories over disease. I am not announcing these "wonder" cures as conclusive, but the statements, as given out, seem to warrant a strong belief that a new medical day for mankind is dawning.

During the year, diabetes has yielded to the discovery by Dr. Banting of Toronto. It is almost a modern miracle. It allows children and young adults a new lease on life. The treatment is by hypodermic injection of pancreatic extracts.

Professor Wagner-Jauregg, of Vienna, leading neurologist, only last June announced the cure of 239 patients out of 300 treated for one form of paralysis. The treatment is by injection of malarial germs and after a fortnight the patient is miraculously cured.

Paralysis has been considered incurable up to this time.

Here is another that strikes nearer home. Dr. Donald Batts of Philadelphia states that cancer can be cured. Think of how many lives this will save if his treatment works out successfully.

Only last month, two Italian physicians of Rome announced the isolation of the bacillus of scarlet fever, and the effective use of a serum treatment. If this actually has been done it is the greatest disease preventive since the first use of diphtheria serum.

SUPREME COURT GRANTS APPEAL AGAINST DOCTOR
(By The Associated Press.)
RICHMOND, Va., Aug. 23.—The supreme court of appeals today granted the appeal of S. L. Lockhart in his suit against Dr. William Rivercomb of Cifton Forge for \$10,000 damages for the death of his wife, who, he alleged, died as a result of professional negligence. Lockhart's suit was dismissed by the Cifton Forge circuit court. The plaintiff charged that the defendant physician failed to take the proper precautions while Mr. Lockhart was undergoing an operation.

Takes soap and water to wash dishes. You can smear on cold cream and cover with rouge.

Rich Beauties
Use this liquid Cleanser Now
By Edna Wallace Hopper

Leading beauty experts advise their patrons to use a liquid cleanser now. But their price is high, so it has been used by only the well-to-do.

Lucien Lantelme, the famous Parisian beauty, gave me this formula many years ago. A French scientist gave it to her. It has since become the leading cleanser, the world over, with those who could afford it.

Its results are marvelous. I have used it for decades. My baby-like complexion, after 32 years as a stage star, shows what that cleanser means.

Now I have that liquid cleanser made for all who wish it. I call it Facial Youth. And dealers everywhere supply it at a modest price.

Its Unique Results.
This is how my Facial Youth excels a cleansing cream.

It contains no animal, no vegetable fat. So it cannot grow hair on the face. It cannot assimilate in any way with the skin. It simply penetrates the skin to the depths, to clean every pore. When I wipe it off, all the dirt and grime, all that clogs the skin comes with it.

It is amazing how much dirt it finds. Clean the skin in the best oil or way you know. Then use Facial Youth and see how much extra grime it gets.

Allison's Strategy Results In Victory

Danville 7; Winston-Salem 8; And, O. 'tis, sad to tell, Oh.

The Danville baseball team had victory snatched from its grasp in the eighth inning of a contest in which they had led all the way when Manager Allison, of the Winston-Salem Twins, sent himself in to bat for Second Baseman McCulloch in the game's crisis with his team one run behind, but with Anderson and Clark on base.

Manager Murphy had just displaced his crack left-hander, Wilson, because the visitors had landed on him for four hits in that inning, had scored two runs and had two in the offing. Allison made good. He met the first ball Maitland, who had succeeded Wilson, delivered and sent the sphere just hard and far enough to clear the short right-field fence. Thus, instead of trailing Danville by one run, this drive put the Twins two runs to the good.

Danville tried hard to come back and overcome the lead and almost succeeded. In their half of the eighth, Eddie Regan opened with a two-cushion shot, and Manager Murphy bunted, advancing Eddie to the hot corner. Catcher Cochlin had batted well off McCleod, but the local management preferred to take a chance on big Lou Kearney, who responded with a long fly to left on which Regan registered. With nobody on, Pitcher Braxton Gibson was sent in to bat for Maitland. He drove a long foul to left but it merely counted as a second strike, and Pitcher Howard, who had displaced McCleod, slipped the third strike over on him. Pitcher Ledy Ellington had retired the Twins hitless and scoreless in the ninth, and Danville strove to annex the extra run needed to tie, even if they could not hammer in sufficient to win. Dorman poked a single through the center of the diamond, and Leard laid it down and came within an eyelash of beating out the bunt, but Umpire Ferguson couldn't see it that way and waved him out. Then Ted Smith came up for his fifth inning rally which netted three runs. "Goose" Goslin lifted one of Holloway's fast balls over right field bleachers for a home run, the hit being one of the longest seen at the park this season.

Greensboro Again Loses To Raleigh

GREENSBORO, N. C., Aug. 28.—Raleigh and Greensboro battled for ten innings here today and the visitors winning by the close score of 7 to 6. Two runs by the Capitals in the tenth while the locals were able only to put across one tally, gave Duncan's crew the victory. It was Raleigh's third successive victory over Greensboro they having taken a double header on yesterday. Both Crews and Dudley were hit hard. The box score:

Umpires: Morgan and Osborne.

One thousand Scottish girls find work with the herring fleet once the season begins. Some of them are not "girls." It is quite common to see two, or even three, generations represented in these groups. Their work is to split and clean the fish and an expert at the work can clean hundreds of fish in an hour. Other girls are employed to pack the herring in barrels of coarse salt. Usually some girls employed with the fleet are richer by about two hundred and fifty dollars for their three months' work.

Make your skin a business asset

Get rid of those blotches and blackheads! That skin trouble may be more than a source of suffering and embarrassment—it may be holding you out of a better job for which a good appearance is required. Why take a chance when Resinol? Resinol treats skin eruptions so easily.

Resinol Soap and Resinol Shaving Stick contain the same soothing properties and are used by discriminating men who like their complexion, clean and healthy, and whose fragrance. At all druggists.

"Resinol wins by improving skin"

Colored globes in chemists' windows were first displayed by Moorish druggists of Arabia and Spain.

Detroit..... 200 000 250—9 13 9
Mogridge and Garrity; Francis, Holloway, Olsen, Hillel and Bassler, Woodall.

SISLER MAY NOT PLAY BALL AGAIN

ST. LOUIS, Aug. 28.—George Sisler will not play any baseball for the St. Louis Browns this year. He does not even intend to don a uniform and work out.

At the opening of the season Sisler planned to get back into the game by August 15. It was his hope to get into the final series with New York here. His attending physicians had assured him there would be no doubt about it.

Sisler still isn't playing. The doctors now tell him there isn't a chance for him to get into the fray this season.

While St. Louis fandom and baseball enthusiasts the country over are disappointed because Sisler's condition has not improved enough to permit his playing, no one regrets the situation more than Sisler.

"I am beginning to worry over the slowness with which my right eye is responding to treatment. I felt sure I would be back in the game long before this," says Sisler.

"Physically I am in perfect condition. I can play a good game of golf. Hitting the stationary golf ball doesn't bother me, but following the flight of a baseball even as a spectator is often confusing.

"Up until now I have been very optimistic as to my chances of getting back into the game shortly. The improvement in my vision, however, has been of such a slight nature in the last eight or ten weeks that I am beginning to worry.

"I am positive that baseball is out of the question as far as 1933 is concerned. Next year is also debatable. I get hundreds of letters daily from well wishers. Some merely express sympathy and good wishes, but a majority offer curses and suggestions as to what I should do. It would take me years to try every remedy that has been offered me.

"Of course, I hope to get back into baseball some time in the near future, but that is as positive as I can be about my chances."

There are some medical experts who express grave doubts as to whether Sisler will ever play again. They are of the opinion that the condition of the paralyzed nerve will always remain such, that baseball will be out of the question.

Unquestionably Sisler's mental state is not what it would be were he showing gradual improvement. For this reason it is not believed that he will accept the management of the club unless he is able to play and do his bit.

AMERICAN SHIP FORCED OUT BY AN ACCIDENT

(By The Associated Press)

RECORD

GEORGES BARBOT (unpiloted) recently flew 212 kilometers in his motorless glider. That's 132 miles. He did it in 6 hours 4 minutes, over an officially measured circuit at Vauville, France. That's best record yet for that type of plane.

POSTPONES HIS TRIP

SARATOGA SPRINGS, N. Y., Aug. 28.—Rather than risk the danger of further aggravating his cold, Dempsey postponed his contemplated fishing trip today and remained in his cottage on the shores of Saratoga Lake, to keep out a cold, drizzling rain that was still falling when he crawled under the blankets for a night.

Two Tough Ones at Raleigh

The Tobaccoists leave this morning for Raleigh for a two days' engagement with a dangerous team in the runner-up and just victorious over Greensboro in three games.

Tumbly and Maitland will probably be the box-men for Danville, if there is in good form, but Ellington work in one game. With Manager Murphy back in the play, the leaders are strengthened for this important series.

Reds Creep Up On Giants; Detroit Defeated

Grandstand Gaff

So Long Winston.
It is quite a relief to see the Prince Albert club leave the city. Beginning the latter part of last week the Winston club developed into the league's "Jonah" for the Virginians. Their apparent strength against Danville lies in their ability to keep fighting, the thing that placed the Tobaccoists on top of the circuit.

Duel of Wits.
The game in which the Twins came out triumphant contained much clever headwork. Allison's strategy and his ability to deliver a home in a pinch-hitting role brought victory to the visitors, while Murphy was used in every game to overcome the lead. "Allie" came in for a lot of good-natured razzing but when it comes to a stirring up of the gray matter the Twin pilot has few superiors in the loop and there are managers in the Piedmont who are not near as popular.

Trex The Slugger.
There is no doubt that Trexler has regained the batting eye and vicious swing that makes him so popular with the fans. A home run and a triple yesterday following a circuit clout of the day before is the mode of slugging that made one George Herman Ruth well-known. And Trex is not so far behind Erratic Carr Smith for premier swatting laurels of the loop. His four-base wallop yesterday was his 10th of the season and half. Floyd now leads Resco by three homers and the fans are watching the summary to see the big first-sacker in his attempt to catch his heavy-hitting teammate.

Shortstop Mariette.
Allison's new infielder, who has paraded in faster company, yesterday made his debut with the Twins taking Mike Fuhrey's regular berth at short. The former Elton College player bungled a pick-up and looked weak on another but his hitting was of a better class, and his form makes one think the gangly short fielder may prove a valuable man to the Winston club.

Watch Raleigh.
Duke Duncan's outfit yesterday batted Greensboro their third straight defeat after 10 innings of battle. "Shiek" Siner, the Raleigh receiver, and his trusty bat was the main factor in the victory and not Messrs. Smith and Barrett as customary. In fact "Jumbo" Barrett, get the "Jumbo"—was the cause of the Capitals not tucking away the victory earlier in the struggle. The husky first-baseman is a dangerous hitter but he appears often to be all above the shoulders. In the Greensboro game Barrett hit for two bases in the fourth but forgot to put his big pedal extremities on first as he passed and was called out. In the eighth Bill Pierre made him look Jumbo-like by catching him off first where he was run down.

Gibson and Whitted.
Durham recaptured on the Furniture Makers due much to the superb work of Alec Gibson and "Boss" Whitted, the former Toledo pilot. The South Carolina school teacher let the Pointers down with three hits, two of which were of the scratch variety, while Whitted hit a homer, a triple and a single out of three times up. Danny Overton also hit for three bases, probably to make up for his two bobbies afield.

Old Dominion Race.
Wilson took a slight edge over Richmond in the Virginia league tussle yesterday by defeating Petersburg the second straight while Richmond was falling before Norfolk, the other contender, after winning a double bill on Monday. Killefer, Norfolk first baseman was the star of the day, securing five safeties out of five trips up, four of which were for two bases.

Welcome "Lefty."
It was with considerable pleasure that Danville sport followers received the announcement that "Lefty" Wilson, the University of North Carolina product, would become a regular Virginian for the time being. "Lefty" who originally intended coaching in

the Greensboro High, was persuaded by Superintendent Griggs to take charge of the athletics in the Danville schools. The move was a good one not only for the schools but for Danville's club in the Piedmont circuit, as the portside will be of great use to Manager Murphy during the remainder of the season and in the tussle of tussles should Danville nab second-half honors. The school head's choice of Wilson as director of athletics seems to be a wise selection. The southpaw was a star in Carolina athletics and his gentlemanly qualities in play and on the campus made him a leading favorite with the hundreds of students and the faculty. Younger Danville should be the better for the move.

That Director's Meeting.
There are many queries as to why the much-talked-of director's meeting continues to be postponed. And justly there is a right for the thought that there may be an ulterior motive behind the postponement. The troubling question is, do the other clubs around the loop fear that Danville will drop out in case all her victories are taken away and are holding the meeting off until the season is practically over so that if the decision goes that way a kick-out by Danville will not hurt the financial and other aspects of the loop? Manager Murphy has taken his medicine like a man heretofore and such a move, were the rumor so, would be a wicked blow below the belt. It can hardly be for the same idea of fair play that caused the Twin secretary to give Bramham the correct dope on the dispute will triumph over those who have not the same qualities of sportsmanship.

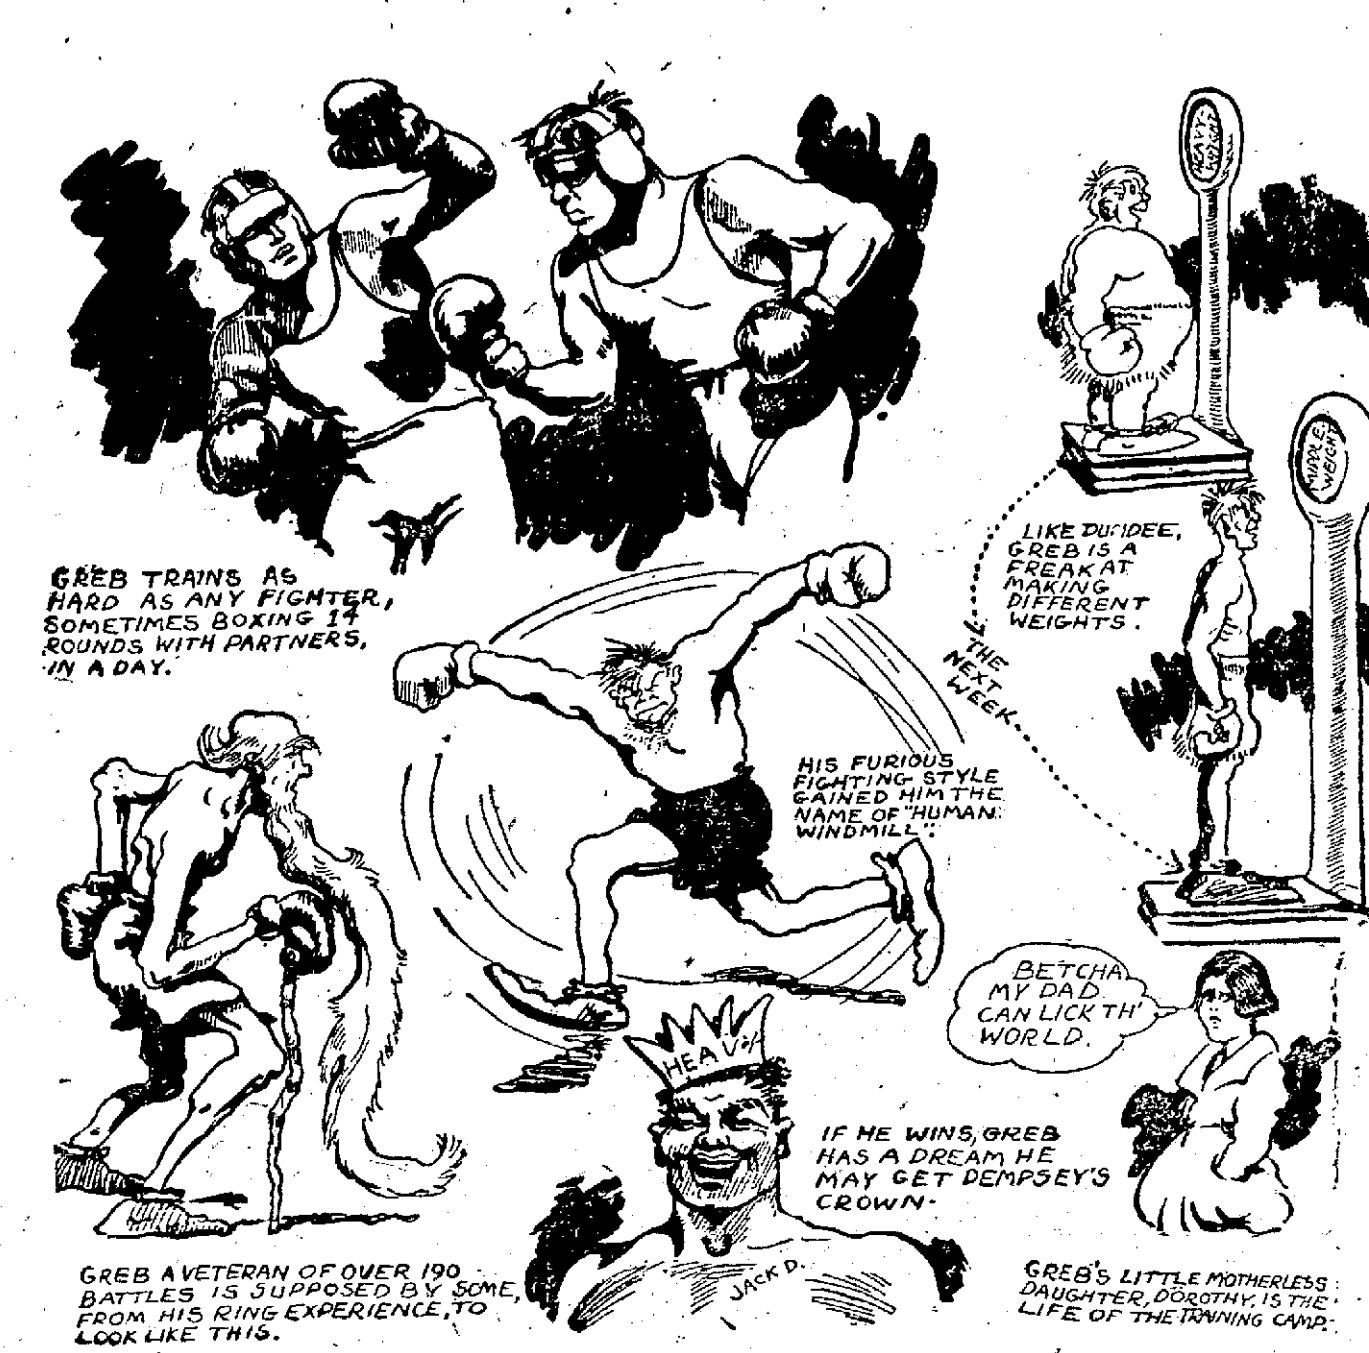

Games That Count.
The two games with the Capitals today and tomorrow will have a great influence on the final outcome from the present lay of things. Raleigh has developed into something dangerous and the manner in which Murphy and his men handle Duncan's slugger these two games will be watched with much interest around the Bramham wheel. Following the two games the Tobaccoists return home Friday and Saturday to do battle with the Pointers.

VIRGINIA TEAMS IN CLOSE RACE

(By The Associated Press)
RICHMOND, Va., Aug. 28.—Teams of the Virginia league continued their game of "hide and seek" today, the Winston Tobaccoists losing to the Richmond Colts out of first place and taking the lead in the pennant chase by half a game. The Colts went into the first position yesterday when they took two games from the Norfolk Tars and broke the Narves cornered the which existed Saturday. The Tars retaliated today by taking the third game of a five game series, 10 to 2. The Tobaccoists won another victory over Petersburg, six to three and took the lead, with Richmond second, one full game ahead of the third place Tars. Rocky Mount, virtually out of the pennant race, "came back" today and shut out the Portsmouth Truckers six to 0.
The Colts and Tars play another double header here tomorrow. Wilson will meet Petersburg again in the final game of the series before going to Norfolk to play the Tars Thursday. Rocky Mount and Portsmouth will play again at Rocky Mount tomorrow. Thursday the Colts will play the Truckers while Rocky Mount and Petersburg enter a three game series.
H. P. Dawson, owner of the local club announced tonight following a telephone conversation with Frank D. Lawrence, owner of the Portsmouth club, that the three game series between the Colts and Truckers for the last half of the week, had been transferred to Richmond by agreement. The games were scheduled to be played in Portsmouth, but it was understood, the club owners agreed that bigger crowds would witness the games if they were played here.

JIM HAM A BARRIS

J. Ham Lewis keeps up a running copperation on the political situation, but modestly declines to say who would make an ideal nominee for either first or second place on his party's ticket.

Durham Wins Over Furniture Makers

DURHAM, Aug. 28.—Pitcher Alec Gibson allowed the Pointers but three measly hits, two of them of the scratch variety, and Durham easily won today by the score of 5 to 1. Whitted batted a thousand getting a home run, a triple and a single in three times at bat. He was hit by a pitched ball the fourth time up. The visitors had only three men left on the cushions, indicating that they did not get them on. The box score follows:

Kinks o' the Links

How many times has John Ball won the British amateur championship? Did he ever win the British open title?

John Ball, one of the most remarkable golfers of all time, has won the British amateur title seven times. He first won in 1888. His seventh victory was scored in 1910. Ball won the British open title in 1890. He also won the amateur championship that year.

Playing a two-balls foursome, Smith and Jones are partners. Smith drove his ball out of bounds. Does Smith or his partner, Jones, play the dropped ball?

Smith's partner, Jones, plays the dropped ball.

Is there any penalty for a ball striking a flag stick in the hole?

There is no penalty in match play for a ball striking the flag stick while it is in the hole, regardless of the distance from which it is played.

COBBLER IS RELEASED
COLORADO SPRING, Colo., Aug. 28.—Jucinto Fernandez, 20-year-old Denver cobbler, held for investigation in connection with the mysterious death of Mrs. Elsie Suttle here Thursday was released at the conclusion of a coroner's inquest last night.

The verdict of the jury was that the girl's death was caused by wounds inflicted by a heavy object in the hand of a person or persons unknown.

WHY IS THE DIRECTORS' MEETING POSTPONED?

Around in Danville short circles where the welfare of Murphy's club is considered nearly on par with the outcome of the coal controversy a troublesome question has bobbed up concerning the postponement of the director's meeting, which has been hanging over the league for several weeks. Some of the fans think there is a motive in the delay of the pow-wow, while others would at least like a little enlightenment as to the reason. Those who think that there is something not altogether right in the delay are of the opinion that the meeting is being held off until the season is so near the final curtain that it will not hurt the status of the league should all Danville's games be taken away and Murphy withdraw from the circuit.

Other critics in the loop seem to have the impression that the directors will take an "extra pound of flesh" from the Danville club and that the move will force the club out of the organization. With this impression prevailing the fans are justified in their thought that the moguls of the other clubs are holding off the conference so that such a dispute would not tear up the league this season and then they would be able to re-organize by next spring. Under no basis of square sportsmanship can any more games be taken away from the Virginians and the troubled conscience of the others show that they think likewise. They all know that there would be a kick should the directors rule in that manner and perchance they want to see several more games before winter and its accompanying coal controversy is near.

It is hardly likely that the directors of the other clubs have such a motive as the sportsmanship of the Winston secretary pretends elsewhere and such plays would not be tolerated, but nevertheless the hand of President Bramham, or who ever is holding off the meeting, should be called Charlie Brown, whose eruption of sport dove appears in the Greensboro Record, and who would like to see any of the other five clubs win than Danville, takes the same fair-minded view of the matter. He is for Greensboro last and forever but wants the

Daily Puzzle

The letters in the title of the large volume in the book rack have been mysteriously shaken from place, so that they form the five words "Racy, West, Bid, Ton, Rise." Can you rearrange the letters that form those words, so that they will be in their correct order, forming the name of a very well-known book?

Yesterday's answer:

1. O
2. ORE
3. ORE
4. HERO
5. HEROIN
6. HEROIN
7. HEROIN

The word "O" may be "built up" into the word "Heroin" by the set-ten steps shown above. One letter is added at each step, and each step forms a new word.

GERMAN SOUVENIR-HUNTERS

STEAL 5,000 MUGS IN MUNICH

MUNICH, Aug. 28.—The State beerhouse, where hundreds of people drink out of huge mugs with lids, is deplored the loss of 5,000 of these which were taken away as mementoes during festival week. Besides 480 knives and forks and many decorated plates, in five days nearly a million visitors came here for the athletic festival, it is suggested many of these pilfered the mugs, plates and cutlery.

LOAN IS IMPROVED

WARSAW, Aug. 28.—The Cabinet late Sunday night approved of a project for a \$100,000,000 loan from the Morgan Harjes Bank of Paris. M. Juritsch, minister of finance, was authorized to carry on the negotiations. An order speeding up the draft of the charter for the bank at emission to issue bank notes guaranteed by the Morgan loan was also signed at mid-night by the premier.

A New Standard Of Tire Satisfaction

YOU owners of light cars are going to enjoy a new standard of tire satisfaction when you equip your cars with Goodyear Tires.

When you have given these tires a trial, and are yourselves familiar with their advantages, you will have a new conception of satisfactory tire performance. These tires are built in the world's largest factory devoted exclusively to the construction of light-car sizes. They are built to give longer and better service than ordinary tires.

Put Goodyear Tires on your cars and convince yourselves of their economy. They cost no more than the ordinary kind.

Irish Elections
Will Remain In
Doubt For While

(By The Associated Press.)

PUBLISHED Aug. 28.—With the exception of the National University contest no election results or figures have yet been officially declared in the general polling for members of the Dail Eireann throughout the Irish Free State. Therefore, still impossible to make any estimate of the eventual length of the respective parties in the Dail.

Nevertheless there are indications of the possibility of the opposing parties being returned in more equally balanced strength than had been expected, and it may be said that the Republicans are tonight showing greater confidence in the results than the government party.

For the National University the government candidates secured all three seats. They were professor John MacNeill, minister of education of the last Dail, and Prof. McGowan. According to the first preference votes which became known today, President Wm. T. Cosgrave in Kilkeny and Carlow headed the poll and secured election. Under the proportional representation system the actual polling figures are announced for several days, but in certain cases the votes on first preference are known and are announced in that way.

President Cosgrave's brother, Philip Cosgrave, governor of the Mt. Joy prison is elected for Dublin City, south General Richard Mulcahy, minister of defense, on the first poll in the north city secured a quota and a surplus large enough, when distributed, to carry the other government candidates with him.

Alderman Alfred Byrne, at present acting as deputy lord mayor of Dublin, standing as an independent, secured a quota in the same division in the south city. Countess Markievicz reversed her last year's defeat, while Frank Aiken, the such wanted chief of staff of the Republican army for some time has been on the run, also won a seat in the Dail. It is considered remarkable that he was third on the poll, as he was once responsible for the irregulars' decision to dump instead of surrender their arms.

Another feature of the elections was the small poll throughout the country, which the Republicans count as extremely favorable to the cause. The election in Limerick practically their full strength. The government party tonight put their claims modestly at 40 seats and they for the Republicans won 20. The Republicans themselves claim 45 and their chief orators are in high spirits. They admit disappointment, however, at the small poll. The bulk of the general elections official and semi-officially announced on 11 October to give the government 26 seats and the Republicans four. The Farmers party is credited with two, the Independents with three and Labor one.

The times given the following stand: 1. The Irish in the Irish election. 2. Government 18, Republicans 3, Farmers 2, Independent 6, Labor 1.

In Scotland the bridesmaid is popular known as the "best man" and for a few one of her chief duties was to carry the bride's presents on the wedding day to her future home. Ninety per cent of the women of China cannot write their own names.
